COMBAT T-SHIRT

Modern army combat t-shirts are made with a 60/40 or 50/50 cotton and nylon blend of special materials that help insulate the skin when exposed to high temperatures such as fire and explosions. Unlike polyester or "polypropylene", the resulting blend does not melt on the skin, thereby reducing burn injuries. Nearly all army combat shirts feature Non-Fusible/Drop Cordura Baselayer fabric to cover the body. Unlike heavy Nomex garments, this extremely light and extra comfortable body fabric is not only durable but also breathable to the skin, increasing airflow between the skin and the fabric, wicking sweat away. ARES's most important issue is customer satisfaction and acts with the principle of 100% customer satisfaction. Thanks to its quality guarantee, it has been entitled to receive the ISO 1 0002: 2004 Customer Satisfaction System Certificates, which are revealed with the ISO 9001: 2008 Quality Management System .

TECHNICAL SPECIFICATIONS FOR PANCO RAINCOAT	
Chemical Properties	
Raincoat fabric features	
Type of material	% 100 Polyester
Square meter weight	Covered 105 gr./m2
Tissue	1/1 Bouquet Rip-Stop
Yarn Frequencies	
Weft Density	28 cm.
Warp frequency	45 cm.
Breaking Strength	
In the direction of the weft	250 N
In the warp direction	500 N
Tear Strength	
In the direction of the weft (warp tear)	25 N
In the warp direction (weft tear)	20 N
Water Absorption Value	Flexible Footway Covered With Polyurethane to provide Water Properties
Temperature resistance	Minimum 5,000 Mm Water Column After 10 Drains 3,000 Mm
Cold resistance	Steering At 70 ± 2 °C 20 Hours Explosion Breakdown Deformation Occur
Color fastness	-20±2 °C 20 hour crushing
Commercial House Type Collar Color Provision	Flowing 4 Fading 4
Color Provision Against Air Conditions	3-4
Color fastness to rubbing	Dry 4 Wet 3-4
Friction resistance	At the end of 30,000 revolutions do not clap in the thimble and warp yarns
